

International Journal for Multiscale Computational

Chief-in-Editor: Jacob Fish

Senior Advisor: J. Tinsley Oden

Associate Editors: Ted Belytschko, Thomas J. R. Hughes, Efthimios Kaxiras, Tamar Schlick, David Srolovitz, Wanxie Zhong

Ref: LaTeX Guidelines for paper preparation for the *International Journal for Multiscale Computational (JMC)*

Dear Author:

This directory contains the LaTeX style files and a template for the preparation of manuscripts for the JMC. In particular

- **Template for JMC.tex** is the main LaTeX file that provides the overall format for the paper preparation. The corresponding PDF file shows the published format of an accepted paper.
- **bes_39.cls** is the style file for this journal based on which you will need to prepare your document.
- **Bibliography_Style.bst** is the required style for the bibliography.
- **References.bib** is a text document containing an example list of references using BibTeX formatting.
- **Fig1.eps** is an example of the required format (.eps) for figures.
- **FontInstallation.pdf** is a brief font installation instruction.

Please note that while submitting the paper for review, you will need to prepare your PDF document by changing the two first lines of the .tex file as follows:

```
\documentclass[review,article,authoryear,jmc]{beg_39} % review version
%\documentclass[article,authoryear,jmc]{beg_39} % final version
```

This will allow double spacing and numbering of lines thus facilitating the review process. The current option in the .tex file prepares the document in its final accepted version.

The LaTeX templates provide guidelines for entering multiple addresses for the authors or one common address. The corresponding author information including Email are required.

The font *Palatino* is required by the journal style and can not be included in your TeX distribution. In this case the font can be downloaded from [this page](#). A brief font installation page can be found [here](#) or in the FontInstallation.pdf file.
