

16. Subject Index

- Absorption coefficient 186
- Acceptance test 446
- Accident prevention regulations 459
- AD specifications 362, 460
 - Air
 - excess 238
 - forced flow 371
 - heater 370
 - requirement 169
 - volume 11
 - volume control 227
 - Analysis data of heat carriers 41, 447
 - Asphaltenes 27
 - Atomizing pressure 222
 - Automatic oil firing 432
 - Average value, logarithmic 159
- Bacharach 239
- Bellows 288, 327
- Biot number 192
- Boiling curve 14
- Bolts with elongation shank 349
- Boundary layer
 - hydraulic, thermal 32
 - temperature 32, 136
- Bracing diagram 351
- Burner 222
- Burning-out time 178
- Burst disks 304
- Bypass 91
- Cable 427
- Calculation specifications 461
- Capillary pressure 344
- Carbon monoxide content 237
- Carbon skeletons 178
- Cavitation 252
- Centrifugal gas separator 466
- Centrifugal pumps 239
- Characteristic strength values 363
- Chemical heat fo reaction 168
- Circulating pump 239
- CO content 237
- Coking residue 27
- Cold medium receiver 79
- Combustion 168
- Commissioning 449
- Condensate collection vessel 84
- Conradson value 27
- Constant volume control 90
- Constant spring suspension 339
- Control accuracy 401
- Control at constant circulating volume 410
- Control circuit 404
- Convection 68
- Conveying pumps 229, 239
- Cooling pump 229, 239
- Cooling of pump shafts 273
- Cracking 10, 30
- Cylinder heating 378
- Decomposition rate 30
- DIN 4754 459
- Dissociation 172
- Distillation 13
- Drainage vessel 85, 362
- Droplet combustion 178
- Eddy diffusion 178
- Efficiency, thermal 236
- Emission 148 ff., 188, 441
- Enthalpie 173
- Euler's buckling equation 319
- Evaporation vessel 74, 102, 360
- Expansion volume 102, 361
- External toothed gear 229
- Extinction coefficient 186
- Film temperature 191, 210
- Fire protection 439
- Fittings 283
- Fixed points
 - for pipeline systems 338
 - for pumps 280
- Flame dimensions 177
- Flange dimensions 341
- Flanged connections 310, 341
- Flash point 22
- Flow diagram 59
- Flow diagram (throttling orifice) 395
- Flow limiter 69, 402
- Flow of current diagram 413
- Flow performance curve 302, 409
- Flow rate 395
- Flow shapes
 - laminar, turbulent 120
- Flow temperature 116, 209
- Flue gas 236, 237
- Flue gas analysis 169, 237
- Flue gas data 237, 238
- Flue gas losses 170, 236
- Force of inertia 118
- Force of viscosity 118
- Fuel oil
 - burner 222
 - filter 232
 - preheater 232
 - systems 230
 - viscosity curve 220
- Fuels 219
- Functional test 448
- Furnace 175
- Furnace back-pressure 227

Gas burner 234
Gas separator 74
Geometry factor for pipelines 323
Gland (packing) 284
Guarantee values for pumps 267
Guaranteed performance field (centrifugal pumps) 267
Guide tube for metal bellows 328

Hand hole 363
Heat carrier
– boiling range 14, 23
– corrosion behaviour 14
– density 18
– limit of application 30
– properties 30, 51, Appendix
Heat enthalpy 116, 173
Heat flux density 183
Heat flux performance curve 409
Heat radiation 148
Heat release 174
Heat requirement determination 366
Heat transfer 65, 134
Heat transfer coefficient 136
Heat uptake 191
Heat uptake area 191
Heater 161
Heater room specifications 437
Heating cylinder 378
Heating elements 162
Heating element installation 164
Heating in
– blood meal production 479
– coating machines 495
– concrete industry 481
– container ships 490
– cylinders 378
– driers 496
– fibre board works 500
– galvanic tanks 467
– marine 487
– paper industry 508
– Presses 383
– refinery 465
– textile industry 505
Heating surface 368
Heating tapes 225
Height of ascent, capillary 345
Henry's law 12

Identificaion of pipes 315
Ignition load 234
Immission 441
Inert gas 81
Influence of viscosity 137, 250
Inlet length (heat transfer) 141
Inspection openings 363
Installation specifications 437
Insulation 352
ISO recommendations for pipes 313

Kármán factor 321
k, value 298
– correcting diagram 301
Lambert's law 148
Leakage 73, 345
Leakage gas 235
Level control 74, 392
Level measurement 392
Light sensor 435
Limiter 74, 411
Longitudinal elongation (pipeline) 316

Mass flow 116
Maximum velocity field 195
Measurement (temperature, pressure, level) 389
Measurement record 450
Metal hos connection 385
Metal seals 348
Mixing control 73
Mixing diagram 221
Mixing installation 228
Mixtures of isomerics 9
Modulus of elasticity 318
Momentum exchange 178
Motor
– protection switch 418

Naphthene 15
Neutralization number 27, 44
Normal radiation intensity 148
Nozzle heating 226
Nozzle return valve 293
NPSH value 252
Number of load cycles 329
Nusselt numer 137

Oil burners 222
Oil burner pump 228
Oil coke formation 273
Oil preheater 232
Opening ratio of orifices 396
Operation control sheet 44
Operational sealing force 346
Organic heat carriers 9
Orsat apparatus 237
Output control (gas burner) 235
Overall heat transfer coefficient 156
Overflow line 73
Overhang length in pipeline systems 320
Oxidation = aging 10
Oxidation zone 178

Packing stuffing box 283
Paraffins 15
Parallel circuit 87, 254
Parallel flow (heat exchange) 159
Performance curve (centrifugal pumps) 245
Performance field
– of heaters 206
– of pumps 241

- Pilot flame 234
- Pipe
 - friction coefficient 122
 - helical 123
 - seamless 311
 - welded 311
- Pipe bend influence 141
- Pipelines 310
- Pipeline performance curve 248
- Planck's law 148
- Pour-point 21
- Prandtl number 37, 138
- Press pressure, critical 285
- Pressure impulse 90
- Pressure levels 248
- Pressure line 70, 135
- Pressure loss
 - calculation 129
 - permanent in orifices 395, 398
- Pressure maintaining point 70, 475
- Pressure maintenance height 250
- Pressure measurement 392
- Pressure test 447
- Pressure vessel 362
- Primary control 404
- Primary pump 110
- Pumps shaft seals 272
- Pumps 239
- Quality specifications for pipes 313
- Quenching vessel 274
- Radial sealing rings 279
- Radiation 148
- Rate of heat release 174
- Ratio of slenderness 319, 444
- Reactions
 - heat 168
 - surface 179
- Receiver volume 79
- Regulations 455
- Resistance coefficient 121, 300
- Resistance thermometer 389
- Return valves 291
- Reversing flame 197
- Reynolds number 120
- Rotating cup burner 226
- Rotor diameter 243
- Rotor relief 271
- Roughness, relative 122
- Rules of technique 459
- Safety engineering equipment 107
 - Temperature limiter 74, 412
- Safety valves 303
- Salt melts 6
- Sampling 451
- Sealing liquid 274
- Seals 346
- Secondary circuit 71
- Selection criteria 45, 96
- Series connection of electric heating elements 164
- Shutdown 450
- Single-pass flue gas system 199
- Slide-ring seals 272
- Solidification point 20
- Solubility of gases 11
- Soot
 - absorption coefficient 186
 - blower 198
 - size 178
- Specification of BG-Chemie 459
- Spill control 408
- Spill Valve 229
- Spindle seal 283
- Split tube motor 266
- Spring suspension 338
- Stability limit 10
- Stack 441
- Standard pumps 270
- Star-delta circuit 164, 423
- Steam drying 376
- Steam generator 374
- Stefan-Boltzmann's law 149
- Stop valve 283
- Storage vessel 362
- Straight-way control valve 302, 407
- Strength grades 349
- Subsidiary control circuit 92
- Surface pressure (seals) 346
- Surface temperature 358, 380
- Swirl 180
- Symbol 59
- Synthetic heat carrier 16, 53
- system performance curve 105, 242
- Tap water provider 378
- Temperature curve 75, 177
- Temperatute field 137
- Test certificate 315
- Thermal conductivity 20, 352
- Thermal elongation coefficient 316
- Thermal stability 10
- Thermocouple 390
- Thermoshock 282
- Thermosyphon flow 96
- Three-pass flue gas system 199
- Three-way control valve 295
- Throttling path on pump shafts 274
- Tightness tests 235
- Time cycle, controller system 404
- Trade regulations 455
- Transition range (heater) 198
- Turbidity point 20
- Two-line system 230
- Two-point controller 404

Ultimate analysis 168
VDI specification 460
Velocity profile 120
Venting 87, 439
Vibrating metal buffer 281

Viscosity 20, 220
Viscosity number 301
Wien's displacement law 148
Yield point 325
