

## Index

### A

Acrylic dispersions, xxxv, 462, 463, 485  
 Added mass-mode, 7, 12, 16, 19, 21, 27, 32, 35, 38, 41–55, 73, 90

### B

Bench for investigation of motion of granular materials under vibration, 209  
 Bifurcation, 186, 192–195  
 Blending, 471, 474, 475, 500  
 Bogolyubov N.N., iii, 33, 121  
 Bottom-hole formation zone, 258, 283, 393, 395–398, 401, 410, 448, 449  
 Bubble submersion, 62, 67, 68  
 Burgers equation, 252, 254, 256

### C

Capillary, xx, 57, 100, 101, 103–112, 117–130  
 Cavitation, 281, 289, 292–296, 299, 304, 310–312, 317, 320, 325–328  
 Cement stone strength, xxxv, 352, 392  
 Colmatation, 283–285, 382–384, 389, 391, 393  
 Criterion of mixing efficiency, 298, 301, 302, 307, 308

### D

Decrease in the viscosity under the wave influence, xxxiv, 349, 351  
 Dependence of the pipeline hydraulic drag on the wall compliance, 200  
 Drilling advance rate, 383, 391  
 Drilling agent mud, 248, 249, 279, 280, 283, 382–386, 389, 391–393

### E

Elimination of the crisis of heat exchange,

xxxv, 496

Enhancement of oil and gas recovery, iii,

xxxvi, 381, 382, 395, 413, 421

Equations of motion of bubbles in

oscillating liquid, xvi, 59, 67, 68, 79, 88

Equations of motion of porous medium

saturated with liquid, xxi, 251, 252, 259, 268

Equations of motion of solid particles in

liquid and gas, 2, 11, 28, 30, 33, 35, 40, 47

Experimental rig “Reservoir”, 438, 442

### F

Filtration flow(s) in the porous medium(s), xli, 276

Flexible coatings; flexible wall coatings, xxv, 145, 197

Flotation, 55

Flow wave generators, xxxiii, xxxv, 278, 310

### G

Gas-lift technique of oil extraction, 132, 408, 409

Generators creating shock pulses, 339, 410

### H

High-pressure generators, 438, 439, 440, 441, 442

High-resistant emulsions, xxxv, 465, 476, 485, 492, 497, 508

Horizontal well, xxxviii, 393, 401, 402

### I

Incomplete cement top in cementing well bores, 390

Increase in oil and gas recovery of

reservoirs, 410, 447, 451  
 Increase in the flowability of cement mortars, xxxv, 352, 354, 355, 356  
 Increase of gas condensate recovery, 65, 617, 620, 621, 630, 634, 636

## K

Kelvin-Helmholtz Instability, 184  
 Kramer M.O., 196, 197

## L

Laminarizing coating, 145, 146, 154, 159  
 Localization of particles (Particle localization), xiv, 1, 7, 10, 11, 15, 17, 27, 28, 55, 56  
 Lyapunov A.M., iii, v

## M

Main oil pipelines, xxix, 218, 228, 230, 231  
 Mixing devices such as the “drunken barrel”, 5  
 Modes of motion of bubbles in fluctuating liquid, xviii, 57, 58, 62, 75, 78, 86, 90, 94, 96, 98, 99, 142  
 Monotone and one-direction(al) motions of solid particles in liquid, xi, xiv, 1, 8, 27, 30, 35, 36, 38, 40, 42, 48, 55  
 Motion of gas inclusions in oscillating capillaries, 128, 129  
 Motions of solid particles in liquid in the form of chaotic advection or homoclinic structures, x, xi, xiv, 46, 53  
 Multiphase medium, vi–xi, xxiv, xxix, xxxii, 2, 57

## N

Nanosilica, 373, 378, 463, 482  
 Nonlinear instability of Poiseuille flow in a pipe, 185

Nonlinear parametric interaction of waves in porous media saturated with liquid, 286  
 Nonlinear resonance, viii, xii, xviii, xix, 218

## O

Oil recovery, 410, 447, 451  
 Oscillation of the liquid free surface, 165

## P

Phase diagrams, 608, 609, 610, 615  
 Phase permeability, 622  
 Pneumatic stabilizers, 388, 389  
 Pneumatic transportation, 358  
 Poincare A., 19, 124  
 Problem of the Poiseuille flow  
   hydrodynamic stability in a channel  
   with elastic walls, 317, 318  
 Production rate of oil, 410, 411  
 Protection from hydraulic shocks, 218, 219, 220, 223, 230

## R

Reduction in the viscosity under the wave influence (effects), xxxiv, 349, 351  
 Resonance curves of hydrodynamic pressure pulsation at the formation of the dispersed oscillatory system liquid-gas, 62  
 Resonance electromechanical oscillation generators, 346, 451  
 Resonance in porous media, 262, 267, 277  
 Resonance of the “gas-granular material” system, 209, 212  
 Retrograde condensate, xxxix, 412

## S

Secondary flows, 185, 191

- Self-oscillations, 132, 138–140, 186, 190, 192, 386, 425, 427, 430–433, 440, 444, 465
- Separation of particles according to densities and sizes, 1, 56
- Shock wave generators, 339, 410
- Spectral characteristics in the system liquid-gas, 62
- Squire's theorem, 147
- Stabilization and Destabilization of Plane Flows, xxiii, xxv, xxvi, 145, 157, 159, 160, 166, 167, 170, 173, 175
- Stabilizer of wave processes (SWP), xxvii, xxix, 219–222, 232, 236–242, 245, 246, 248, 249
- Suppression of elastic waves in pipelines, 49, 50, 386, 396
- Suppression of hydraulic shocks, 218, 219, 220, 223, 230
- T**
- Tollmien-Schlichting wave, 145, 149, 154, 156, 159, 160, 164
- Toroidal vortex, 315, 316, 320, 327, 328
- Transformation of oscillatory motion into one-directional motion, xx, 27, 36, 55, 57, 73, 208, 268, 278
- Trunk (main, oil-trunk) pipelines, xxix, 218, 228, 230, 231
- V**
- Viscous mode, 7, 12, 16, 19, 21, 27, 32, 36, 38, 39, 42–51, 54, 55, 73, 90
- Vortex generator, xxxi, 313, 324
- W**
- Water-bitumen emulsions, 366
- Water-fuel emulsions, 289, 359, 362, 368–373, 462, 465, 475, 486, 492
- Water-oil emulsions 362–366, 456, 458, 459, 465, 476, 488, 509, 510
- Wave batcher of granular components, 507
- Wave clean of bottom-hole zones, 278, 282, 286, 287, 393, 396, 398
- Wave dispergator, 329, 331
- Wave displacement of gas from porous media, 119
- Wave displacement of liquid from porous media, 123
- Wave forces, xiii, xix, xl, 1, 2, 6, 8, 13, 31, 38, 39, 43, 51, 53–55, 73, 100, 119, 128, 143, 217, 274, 277, 403, 449, 471
- Wave gas pickup and degas, 58, 95, 97, 98
- Wave homogenization, xxx, xxxii, xxxix, xl, 7, 11, 56, 214, 296, 313, 328, 349, 359, 453, 459
- Wave intensification of pneumatic transportation, 213
- Wave machines with a moving operating part (moving body), xxxii, 346
- Wave mechanical engineering, 494, 499, 500
- Wave mixing, xlii, 289, 304, 305, 506, 509
- Wave nanotechnology of materials, xxxiv, 373, 376, 482
- Wave technologies for chemical processes, xxxiv, xxxv
- Wave technology in drilling, xxxviii, 382, 389, 391, 393
- Wave technologies of the processes of dispersion of a gas into liquid, xli, 328
- Wave technology of oil and gas production, xxi, xxxvi, 381
- Wave technologies of saturation and clean refinement, xl, 406
- Wave turbulization, xxiii, 59, 145
- Well generators of waves, xxxviii, 392–394, 396
- Z**
- Zhukovsky N.E., xxvii, xxviii, 4, 219, 222, 223, 225, 342, 345
