

KEYWORD INDEX

Keywords have been extracted from the technical content of paper. The first page of the paper is referenced

Absorption spectroscopy	135	Demixing	151
AC plasma generator	307	Diagnostics	
Activity	581	(low pressure plasmas)	567
Adhesion	369	Diamagnetic cavity	99
Aerosol	529	Diamond films	471
Air plasma	119	Diffusion	151 289
Alternating current	315	Dissociation degree	135 463
Alumina	69	Dissociative recombination	127 135
Aluminum	557	Divertor	379
Analytical and Experimental	369	Drag coefficient	199
Anode boundary layer	223	Drift orbits	379
Anodic attachment	253	Droplet impingement	493
Anomalous diffusion	99	Electrical arc	1 245
Anomalous radiation	631	Electrical probes	61
Antidiffusion	601	Electrode phenomena	299
Arc	151	Enthalpy probes	27 521
Arc-anode interaction	237	Equilibrium calculations	445
Arc flow model	15	Excimer laser	369
Arc furnace	253	Expanding thermal plasma	135
Arc root fluctuations	299	Fluctuating chaos	601
Arc stability	253	Fluorination	567
Asbestos waste	273	Fowler-Milne method	151
Atmospheric thermal plasma	273	Free-burning arc	69 151
Atomic emission spectroscopy	143	Graphite cathode	273
Ball lightning	611	Hall effect	623
Balmer beta-Stark broadening	623	Hard coating thin film	415
Bistability	143	Heat diffusion	369
Boundary layer	483	Heat flux	315
Calorimetry	471	Heat flux measurements	343
Carbon layers	323	Heat flux to a substrate	323
Carbon vapor	437	Heat transfer	299 335
Catalyst	471		403
Catalytic properties	581	Heat transfer coefficient	209
Cathode	463	Heat transfer efficiency	323
Cathode erosion	237	Heating	177
Cathode fall	237	High frequency discharge	483
CF₄ decomposition with CaO(s)	245	High frequency generator	307
CF₄ pyrolysis	453	Hot cathode	265
Chaotic layer	445	Induction plasmas	159
Charge transfer	379	Inductively coupled plasma ICP	107 127
Chemical phenomena	135	ICP torch design	591
Chemical vapor deposition	403	Ionizing plasma	143
Circle fractal	471	Induction plasma	27 557
Coating optimization	591	Inductively coupled plasma	187
Collisional-radiative model	611	Internal gas flows in a plasma	
Combined diffusion coefficients	537	torch	79
Controlled atmosphere	151	Inverse heat conduction	
Cooling system	323	problem	353
DC arc	299	Jet	177 315
DC plasma jets	289	Kinetics of homogeneous	
DC plasma spraying	323	reactions	415
	493		

Langmuir-child formula	245	Physics of growth	483
Large Eddy simulation	1	Plasma	581 623
Laser ablation	361	Plasma deposition	159
Laser induced plasma	369	Plasma diagnostics	199 209
Laser plasma	99		343 361
Laser induced fluorescence	387		387 483
L-H mode switch	379	Plasma diode	483
Lin scan test	547	Plasma flow velocity	
Low pressure arc plasmajet	335	measurement	61
Low pressure plasma	567	Plasma heated fluidized bed	453
Magnesium recovery	273	Plasma jet modelling	15
Magnetized plasmas	631	Plasma maser	631
Magnetohydrodynamics	623	Plasma modelling	119 159
Mass spectrometry	27 437	Plasma particle	199
Mass transfer	27 403	Plasma particle heat transfer	209
Mathematical model	429	Plasma plume	37 53
Mathematical modelling	493	Plasma reactions	
Measurement	315	(chemical kinetics)	483
Metallic vapour	15	Plasma spraying	343
Micro hardness	437	Plasma - surface - interactions	415
Microwave plasma	437	Plasma synthesis	521
Modelling	1	Plasma torches	61 91
Modelling arcs plasmas	69		265 429
Modelling of deposition process	537	Plasma turbulence	631
Modelling RF plasmas	27 127	Plasma/wall boundary layers	223
	403 529	Plasma-wall interaction	353
Molecular modelling	387 567	PLSE	107
Momentum, heat and		Partial local thermodynamic	
mass transfer	169	equilibrium PLTE	143
Momentum transfer	199	Plume core thermal energy transport	
Nanophase materials	521	transport metamorphases	37
Net emission coefficient	15	Plume laminar-turbulent	
Nitrogen plasma	169	transition	37 53
Non equilibrium effects	119 143	Plume transition stages	
Nonlinear plasma permittivity	631	identifikaktion	37
Nonstandard transport	601	Plume wave energy	
Normal impingement	315	redistribution	53
Nozzle expansion	521	Polymers	567
Nozzle shields	343	Power-interruption	107
Nucleation	529	Powder treatment	187
Numerical analysis	169	Proper balance ion efflux	107
Numerical modelling inside		Radiative gas-dynamics	45
a torch	79	Radiative heat transfer	45
Nusselt number	209	Radiative losses	127
Optical actinometry	463	Radiative transfer	15
Optical preform	591	Radiative transfer in real	
Particles	177	spectrum	45
Particles diagnostics	159 199	Radio-frequency plasmas	471
	209 343	Rail gun	623
	521 547	Rare earth metal	265
Particles evaporation	169	Reactive quenching	429
Particles flattening	507 547	Recirculation	127 135
Particles growth	483 529	Recombination	463
Phosgen product formation	445	Refractory metals	557
		Resonant converter	307

Restrike mode	253	Toxic elements	387
Reynolds stress model	1	Transferred arc	299
RF plasmas	187	Transient temperature	369
Rotation	623	Transport phenomena	289
Rotational temperature	463	TRELIBS	387
Scaling criteria for arc flow	91	Tungsten cathode	265
Separatrix	379	Turbulence	1 99
SF ₆ arc	15	Turbulence model	611
Shape factor	547	Turbulent plasma flow	79
Sheath	245	Two temperature plasma	119
Si particles	169	Unsteady high-heat flux	
Si ₃ N ₄ powder	429	measurement	353
Silicon	289 521	Vector potential	127
Silicon carbide	521	Von Karman constant	611
Simulation	177	Vortex plasma	611
Slag thermodynamic		Vortex plasma torch	79 453
composition	273	Walls on floating potential	223
Soot vitrification	591	Water stabilized arc	61 91
Spectroscopy (emission)	151	Water-stabilized plasma torch	143
Spheroidization	187	Wave processes governing the	
Spirality	601	plume transition dynamics	53
Splat diameter	547	Work function	265
Splat formation	547	Working range diagram	591
Splats mean diameter	547	X-ray photoelectron	
Splat shape	547	spectroscopy	437
Splat solidification	493 537		
measurement	507		
Splat solidification modelling	507		
Splat study	557		
Splat thermal contact			
resistances	507		
Steel cementation	437		
St Elmo's fire	611		
Substrate (heat transfer)	335		
Surface ablation	369		
Surface area	581		
Surface chemistry	471		
Surface vaporization	369		
Surface wave	369		
Synthetic silica	591		
Temperature cathode	237		
Thermal contact resistance	537		
Thermal plasmas	45 91		
	177 187		
	245 273		
	289 335		
	403		
Thermal plasma jets	61		
Thermionic emission	237		
Thin ceramic films	361		
3D Transient simulation	1		
Time dependent modelling	69		
Tool steel	415		
Tokamak	379
