

## ACKNOWLEDGEMENTS

The organizing committee of the FAIM '96 conference is indebted to many individuals and organizations for their contribution, support, and endorsement. We wish to thank all of the keynote speakers who shared their views and visions of flexible automation and intelligent manufacturing. We also wish to acknowledge, with many thanks, the original papers of all of the authors who submitted their manuscripts for publication and who presented their work at the conference. Our special thanks are extended to all FAIM '96 reviewers and session moderators who helped to ensure the high quality of the conference.

We also wish to acknowledge, with great gratitude, the help and support received from Dr. Steven Danyluk, Director, Manufacturing Research Center at Georgia Tech; Dr. John Jarvis, Director, School of Industrial and Systems Engineering at Georgia Tech; Professor Derek Fraser, Vice Chancellor, University of Teesside; Dr. Edward Walsh, University of Limerick, and Dr. Paul E. Torgersen, President of Virginia Tech.

Although there are many who deserve credit for their various contributions to the success of FAIM '96, there are some who deserve special recognition for their truly outstanding efforts.

Ms. Gina Adams, Administrative Manager, Manufacturing Research Center, Georgia Tech; Ms. Rachel Crumbley, Public Relations Specialist, Manufacturing Research Center, Georgia Tech; Ms. Dot Cupp of Virginia Tech; Ms. Jo Funk, Administrative Assistant, CIMS program, Georgia Tech; Mr. James John, MSM graduate student, Georgia Tech; and Ms. Jean Tennant, EPICC Corporate Services Manager, University of Teesside, were invaluable to the task of assembling the proceedings for FAIM '96. Without their hard work, this conference and its proceedings would have been impossible.

Finally, we wish to acknowledge the excellent editorial support of Ms. Eve Ferdman of Begell House, Inc. Her patience and enthusiasm for this edited work are sincerely appreciated.
