

References, Bibliography, and Further Reading

BOOKS GIVING A GENERAL TREATMENT

1. Brewster, M. Q., *Thermal Radiative Transfer & Properties*, John Wiley & Sons, Inc. New York, 1992.
2. Edwards, D. K., *Radiation Heat Transfer Notes*, Hemisphere Publishing Company, New York, 1981.
3. Hottel, H. C., and Sarofim, A. F., *Radiative Transfer*, McGraw-Hill Book Company, New York, 1967.
4. Love, T. J., *Radiative Heat Transfer*, Charles E. Merrill Publishing Company, Columbus, Ohio, 1968.
5. Modest, M. F., *Radiative Heat Transfer*, McGraw-Hill Book Company, New York, 1993.
6. Ozisik, M. N., *Radiative Transfer and Interactions with Conduction and Convection*, John Wiley & Sons, Inc., New York, 1973.
7. Siegel, R., and Howell, J. R., *Thermal Radiation Heat Transfer*, 4th Ed., Taylor & Francis, New York, 2002.
8. Sparrow, E. M., and Cess, R. D., *Radiation Heat Transfer*, Brook/Cole Publishing Company, Belmont, California, 1970.
9. Wiebelt, J. A., *Engineering Radiation Heat Transfer*, Holt Rinehart and Winston Inc., New York, 1966.

RELATED BOOKS ON SPECIAL TOPICS

10. Block, A. G., *Heat Transfer in Steam Boilers*, Hemisphere Publishing Company, Washington, 1988.
11. Bohren, C. F., and Huffman, E. R., *Absorption and Scatterings of Light by Small Particles*, Wiley, New York, 1973.

12. Chandrasekhar, S., *Radiative Transfer*, Oxford University Press, Oxford U. K., 1950; also Dover Publications Inc. New York, 1960.
13. Duffie, J. A., and Beckman, W. A., *Solar Engineering of Thermal Processes*, 2nd Edition, John Wiley & Sons, Inc., New York, 1991.
14. Howell, J. R., *A Catalog of Radiation Configuration Factors*, 2nd Edition, McGraw-Hill, New York, 1982 (available on the web at <http://www.me.utexas.edu/~howell/>).
15. Iqbal, M., *An Introduction to Solar Radiation*, Academic Press Inc., New York, 1983.
16. Kerker, M., *The Scattering of Light*, Academic Press, New York, 1969.
17. Lovitt, W. V., *Linear Integral Equations*, Dover Publications Inc., New York, 1950.
18. Paltridge, G. W., and Platt, C. M. R., *Radiative Processes in Meteorology and Climatology*, Elsevier Scientific Publishing Company, Amsterdam, 1976.
19. Palik, E. D., *Handbook of Optical Constants-II*, Academic Press, Orlando, 1991.
20. Welford, W., and Winston, R., *High Collection Nonimaging Optics*, Academic Press, New York, 1989.

BOOKS ON SOME FUNDAMENTAL ASPECTS

21. Born, M., and Wolf, E., *Principles of Optics*, 6th Edition, Pergamon Press, 1986.
22. Blinder, S. L., *Introduction to Quantum Mechanics*, Academic Press, 2004.
23. Jordan, E. C., *Electromagnetic Waves and Radiating Systems*, Prentice-Hall Inc., Englewood N. J., 1950.
24. Kittel, C., and Kroemer, H., *Thermal Physics*, 2nd Edition, W. H. Freeman and Company, San Francisco, 1980.
25. Pauling, L., and Wilson, E. B., *Introduction to Quantum Mechanics*, McGraw-Hill Book Company, New York, 1935.

BOOK CHAPTERS AND REVIEW ARTICLES

26. Amirtharaj, P. M., and Seiler, D. G., "Optical properties of semiconductors," *Handbook of Optics*, M. Bass, Ed., McGraw-Hill, New York, 1995.

27. Chan, S. H., "Numerical methods for multidimensional radiative transfer analysis participating in media," *Annual Review of Numerical Fluid Mechanics and Heat Transfer*, Vol. 1, pp. 305–350, Hemisphere, New York, 1987.
28. Dunkle, R. V., "Thermal radiation characteristics of surfaces," *Fundamental Research in Heat Transfer*, J. A. Clark, Ed., Macmillan, New York, pp. 1–31, 1963.
29. Edwards, D. K., "Molecular gas band radiation," *Advances in Heat Transfer*, T. F. Irvine and J. P. Hartnett, Eds., Vol. 12, pp. 115–193, Academic Press, New York, 1976.
30. Hollands, K. G. T., and Goetzberger, A., "Coating, shielding and honeycombing: approaching the ideal of transparent insulation," *SunWorld*, Vol. 15, No. 2, pp. 14–21, 1991.
31. Hollands, K. G. T., Wright, J. L., and Granqvist, C. G., "Glazings and coatings," *Solar Energy: The State of the Art*, Jeffrey Gordon, Ed., James & James Ltd., London, U.K., pp. 29–108, 2001.
32. Howell, J. R., "Application of the Monte Carlo method to heat transfer problems," *Advances in Heat Transfer*, T. F. Irvine and J. P. Hartnett, Eds., Vol. 5, pp. 1–54, Academic Press, New York, 1968.
33. Howell, J. R., and Menguc, M. P., "Radiation," *Handbook of Heat Transfer*, W. M. Rohsenow, J. P. Hartnett, and Y. I. Cho, Eds., McGraw-Hill, New York, 1998.

44. Winston, R., "Solar concentrators," *Solar Energy: The State of the Art*, Jeffrey Gordon, Ed., James & James Ltd., London, U.K., pp. 357–436, 2001.
45. Yang, W. J., Taniguchi, H., and Kudo, K., "Radiative heat transfer by the Monte Carlo method," *Advances in Heat Transfer*, T. F. Irvine and J. P. Hartnett, Eds., Vol. 27, pp. 1–215, Academic Press, New York, 1995.

SOME SELECTED JOURNAL PAPERS

(a) On Enclosure Analysis

46. Daun, K. J., and Hollands, K. G. T., "Infinitesimal area radiative analysis using parametric surface representation, through NURBS," *ASME Journal of Heat Transfer*, Vol. 123, pp. 249–256, 2001.
47. Dunkle, R. V., "Geometric mean beam lengths for radiant heat transfer calculations" *ASME Journal of Heat Transfer*, 86, pp. 75–80, 1964.
48. Hollands, K. G. T., "A concentrator for thin film solar cells," *Solar Energy*, 13(2), pp. 149–163, 1971.
49. Hollands, K. G. T., "On the superposition rule for configuration factors," *ASME Journal of Heat Transfer*, 117, pp. 241–245, 1995.
50. Larsen, M. E., and Howell, J. R., "The exchange factor method: An alternative zonal formulation of radiating enclosure analysis," *ASME Journal of Heat Transfer*, 107, pp. 936–932, 1985.
51. Naraghi, M. H. N., Chung, B. Y. T. F., and Litkouhi, B., "A continuous exchange factor method for radiative exchange in enclosures with participating media," *ASME Journal of Heat Transfer*, 110, pp. 456–462, 1988.

52. Menguc, M. P., and Viskanta, R., "Radiative transfer in axi-symmetric finite cylindrical enclosures," *ASME Journal of Heat Transfer*, 108, pp. 271–276, 1986.
53. Noble, J. J., "The zone method: Explicit matrix relations for total exchange areas," *International Journal of Heat and Mass Transfer*, 18, pp. 261–269, 1975.

(b) On Heat Transfer Through Insulations and in Planar Situations

54. Chan, C. K., and Tien, C. L., "Combined radiation and conduction in packed spheres," *Proc. 5th International Heat Transfer Conference*, Tokyo, Vol. 1, pp. 72–74, 1974.
55. Doermann, D., and Sacadura, J. F., "Heat transfer in open-cell foam insulation," *ASME Journal of Heat Transfer*, 118, pp. 88–93, 1996.
56. Hendricks, T., and Howell, J. R., "Absorption/scattering coefficients and scattering phase functions in reticulated porous ceramics," *ASME Journal of Heat Transfer*, 116, pp. 79–87, 1996.
57. Hollands, K. G. T., Raithby, G. D., Russell, F. B., and Wilkinson, R. G., "Coupled radiative and conductive heat transfer across honeycomb panels and through single cells," *International Journal of Heat and Mass Transfer*, 27, pp. 2119–2131, 1984.
58. Tong, T. and Tien, C. L., "Radiative heat transfer in fibrous insulations—Part I: Analytical study," *ASME Journal of Heat Transfer*, 105, pp. 70–75, 1983.
59. Viskanta, R., "Heat transfer by conduction and radiation in absorbing and scattering materials," *ASME Journal of Heat Transfer*, 84, pp. 63–72, 1965.
60. Viskanta, R., "Heat transfer by simultaneous conduction and radiation in an absorbing medium," *ASME Journal of Heat Transfer*, 84, pp. 63–72, 1965.
61. Yuen, W. W., and Wong, L. W., "Heat transfer by conduction and radiation in a one-dimensional absorbing, emitting, and anisotropically scattering medium," *ASME Journal of Heat Transfer*, 102, pp. 303–307, 1980.

(c) On Surface and Particulate Properties

62. Brewster, M. O., and Kunitomo, T., "The optical constants of coal, char, and limestone," *ASME Journal of Heat Transfer*, 106, pp. 678–683, 1984.

63. Dalzell, W. H. and Sarofim, A. F., "Optical constants of soot and their application to heat flux calculations," *ASME Journal of Heat Transfer*, 91, pp. 100–107, 1969.
64. Drolen, B. L., and Tien, C. L., "Absorption and scattering of agglomerated soot particles," *Journal of Quantitative Spectroscopy and Radiative Transfer*, 37, pp. 443–448, 1987.
65. Gupta, R. P., and Wall, T. F., "The complex index of refraction of particles," *Journal of Physics D: Applied Physics*, 14, pp. L95–L98, 1981.
66. Hendricks, T., and Howell, J. R., "Absorption/scattering coefficients and scattering phase functions in reticulated porous ceramics," *ASME Journal of Heat Transfer*, 116, pp. 79–87, 1996.
67. Hollands, K. G. T., "Directional Selectivity: The emittance and absorptance properties of V-corrugated surfaces," *Solar Energy*, 7(3), pp. 108–116, 1963.
68. Koylu, U. O., and Faeth, G. M., "Radiative properties of flame generated soot," *ASME Journal of Heat Transfer*, 115, pp. 409–417, 1993.
69. Koylu, U. O., and Faeth, G. M., "Radiative properties of soot in laminar diffusion flames," *ASME Journal of Heat Transfer*, 116, pp. 971–979, 1994.
70. Lee, S. C., and Tien, C. L., "Effect of soot shape on soot radiation," *Journal of Quantitative Spectroscopy and Radiative Transfer*, 29, pp. 259–265, 1983.
71. Manickavasagam, S., and Menguc, M. P., "Scattering matrix elements of fractal like soot agglomerates," *Applied Optics*, 36(6), pp. 1337–1351, 1997.
72. Siegel, R., and Spuckler, C. M., "Temperature distributions on semitransparent coatings," *AIAA Journal of Thermophysics and Heat Transfer*, 10(1), pp. 39–46, 1996.

(d) On Gaseous Properties

73. Chu, H. K., and Grief, R., "Theoretical determination of band absorption for nonrigid rotation with applications to CO, NO, N₂O, and CO₂," *ASME Journal of Heat Transfer*, 100, pp. 230–234, 1978.
74. Denison, M., and Webb, B. W., "A spectral line based weighted-sum-of-gray-gases model for arbitrary RTE solvers," *ASME Journal of Heat Transfer*, 115, pp. 1004–1012, 1993.
75. Denison, M., and Webb, B. W., "The spectral line-based weighted-sum-of-gray-gases model for H₂O/CO₂ mixtures," *ASME Journal of Heat Transfer*, 117, pp. 788–792, 1995.

76. Denison M., and Webb, B. W., "The spectral line-based weighted-sum-of-gray-gases model: A review," in *Radiative Transfer-I: Proc. First International Symposium on Radiative Transfer*, M. P. Menguc, Ed., Begell House, New York, pp. 193–208, 1996.
77. Edwards, D. K., and Balakrishnan, A., "Thermal radiation by combustion gases," *International Journal of Heat and Mass Transfer*, 16, pp. 25–40, 1973.
