

# INDEX

- Adiabatic calorimeter, *xix*  
Analysis  
    of fluorine, 21  
    of products of combustion, 48  
    of starting materials, 49  
Apparatus, passivation of, 12, 46  
Argonne National Laboratory, *xxi*, 2, 4  
Armstrong, G. T., *xxi*  
Auxiliary materials, use of, 16  
Berthelot, M., *xix*, *xx*  
Calculation of small temperature change, 235  
Calibration, with benzoic acid, 5  
Calorimeter  
    Argonne National Laboratory design, 4  
    energy equivalent, determination of, 5  
Calorimetric system, *xvii*  
Calorimetry, general, *xvii*  
Combustion vessel, glass, *xxi*  
Combustions  
    in glass bomb, 14  
    preliminary test, 46  
Correction for "blank", 19  
Corrections, standard state, 19  
Drop calorimeter, *xix*  
ETH, Zuerich, *xxii*  
Flow calorimeters, *xx*, 50  
Fluorine  
    chemical and physical properties of, 6  
    combustion in, techniques for, 14  
    commissioning of apparatus for work with, 12  
    common contaminants in, 9  
    detection of, with (starch + KI) paper, 18  
    dilution of, with inert gas, 15  
    distillation of, 21  
    expansion of, enthalpy effect, 235  
    effects of contaminants in, 10  
    hydrogen fluoride in, 9  
    manometers for use with, 12  
    manufacture of, 9  
    purification and analysis of, 21  
    purity requirements for use in calorimetry, 10  
    reactions of with elements and compounds, 7  
    safe disposal of, 18  
    safety considerations for working with, 17  
    storage cylinders for, 12  
Fluorine, analysis of, 21  
Fluorine calorimeter: gaskets, O-rings, valves, 12  
Fluorine calorimetry apparatus: materials and accessories, 11  
Fluorine calorimetry  
    history, *xx*  
    development of, 2  
    modifications, 3  
    problems with, 1  
Fluorine flame calorimetry, 3  
Gas-handling systems for fluorine and fluorides, 45  
Glass combustion bombs, 43  
Glovebox, use of in fluorine calorimetry, 13  
Gross, P. M., *xxi*  
Heat sinks, 15  
Hess's law, *xvi*  
Hubbard, W. N., *xxi*  
Hydrogen fluoride in fluorine, 21  
Isothermal calorimeter, *xx*  
Kirchhoff equation, *xvi*  
Manifolds for collection of products of combustion, 46  
Margrave, J. L., *xxi*  
Moissan, H., *xx*  
NIST, *xxi*  
Products of reaction, identification of, 16

- Quartz-crystal thermometer, 5  
Reaction vessel, two-compartment, 16, 34  
Reactions of fluorine with elements and compounds, overview, 7  
Regnault-Pfaundler formula, *xix*  
Results, treatment and calculation of, 18  
Sample arrangements for combustion in fluorine, 14  
Sample forms for combustion studies, 14  
Schroeder, J., *xxi*  
Sieben, F. J., *xxi*  
Single-compartment bombs, 31  
Standard molar energy of combustion, 19  
Substances for study, categories of, 14  
Synthesis calorimeters, *xx*  
Syracuse University, *xxii*  
University of Kyoto, *xxii*  
von Wartenberg, H., *xx*  
Xenon fluorides as oxidizers, 5
- Energies of fluorination of:**
- Aluminum, 74  
Aluminum borides, 160  
Ammonia, 202  
Antimony, 88  
Antimony sesquisulfide, 142  
Arsenic, 111  
Arsenic sesquiselenides, 192  
Arsenic sulfides, 138  
Beryllium, 79  
Borides, 160  
Boron, 99  
Boron carbide, 157  
Boron nitride, 146  
Boron sesquioxide, 125  
Boron phosphide, 154  
Bromine, 119  
Cadmium, 68  
Carbides, 156
- Carbon, 104  
Chalcopyrite, 209  
Chlorine, 120  
Cobalt difluoride, 181  
Copper, 77  
Fluorine-containing polymers, 171  
Gallium nitride, 150  
Germanium, 86  
Germanium difluoride, 175  
Germanium dioxide, 129  
Germanium (IV) diselenide, 190  
Germanium (IV) disulfide, 137  
Germanium (II) selenide, 189  
Germanium (II) sulfide, 135  
Germanium telluride, 197  
Hafnium, 63  
Hafnium diboride, 165  
Hafnium platinide, 206  
Hydrogen, 96  
Iodine, 121  
Iron, 89  
Lithium selenide, 187  
Lower fluorides, 171  
Magnesium, 70  
Metals, 60  
Methane, 203  
Molybdenum, 81  
Molybdenum carbides, 159  
Molybdenum disilicide, 182  
Molybdenum disulfide, 141  
Molybdenum selenides, 194  
Molybdenum telluride, 199  
Molybdenum trifluoride, 178  
Nickel, 73  
Niobium, 66  
Niobium diboride, 166  
Nitrides, 145

- Nitrosyl fluoride, 131  
Nonmetals, 96  
Oxides, 126  
Palladium, 91  
Pentamolybdenum trisilicide, 184  
Pentatungsten trisilicide, 185  
Phosphides, 154  
Phosphorus, 108  
Phosphorus trifluoride, 176  
Polycarbonmonofluoride, 174  
Polydifluorosilicon, 174  
Polytetrafluoroethylene (Teflon), 172  
Potassium sulfide, 134  
Rare earths, 91  
Rare-earth chalcogenides, 201  
Ruthenium, 67  
Selenides, 187  
Selenium, 115  
Silicides, 182  
Silicon, 106  
Silicon carbides, 158  
Silicon dioxide, 127  
Silicon diselenide, 191  
Silicon disulfide, 133  
Silicon nitride, 149  
Silicon telluride, 196  
Sodium nitrate, 204  
Sulfides, 132  
Sulfur, 112  
Tantalum, 66  
Tantalum diboride, 167  
Tellurides, 196  
Tellurium, 117  
Ternary and quaternary compounds, 210  
Thiazyll monofluoride, 208  
Thiazyll trifluoride, 208  
Thorium, 77  
Titanium, 61  
Titanium disulfide, 134  
Trimolybdenum silicide, 183  
Tungsten, 82  
Tungsten borides, 169  
Tungsten disilicide, 185  
Tungsten disulfide, 143  
Tungsten pentafluoride, 178  
Tungsten selenide, 195  
Tungsten telluride, 200  
Uranium, 63  
Uranium diboride, 167  
Uranium dioxide, 130  
Uranium hexapalladate, 205  
Uranium nitrides, 151  
Uranium phosphide, 155  
Uranium silicide, 187  
Uranium sulfides, 143  
Uranium tetrafluoride, 179  
Uranium trifluoride, 179  
Vanadium, 85  
Vanadium monosulfide, 139  
Vanadium trifluoride, 177  
Yttrium, 72  
Zinc, 72  
Zirconium, 59  
Zirconium diboride, 164  
Zirconium platinide, 206  
Zirconium telluride, 198
- Enthalpies of reaction with:**
- Chlorine fluorides, 215  
Fluorocarbons, 223  
Nitrogen fluorides, 220  
Oxygen difluoride, 213  
Xenon difluoride, 217
