

ACKNOWLEDGEMENTS

The organizing committee for FAIM 98 is indebted to many individuals and organizations for their support. We wish to thank all of the keynote speakers who shared their views on manufacturing. We also wish to acknowledge, with many thanks, the original papers of all of the authors who submitted their manuscripts for publication and who presented their work at the conference. Our special thanks are extended to all FAIM 98 reviewers and session moderators.

Although there are many who deserve credit for their various contributions to FAIM 98, there are some who deserve special recognition for their truly outstanding efforts. Bob Dryden, Cathleen Davidson, Sally Cross, Jamey Marsh, Jon Griffin, Dot Cupp, Munir Ahmad, Donna Koch, Lorraine Duncan, Irene Lewis, and Clyde Abernathy. Without their hard work, this conference would not have been possible.

A special note of appreciation to our conference sponsors: Oregon Center for Advanced Technology Education, Wacker Siltronic, Inc., and William and Julie Reiersgaard. Without them, the continued quality of the FAIM conferences could not be achieved.
