

INDEX

A

Acceleration, 10, 11
Analogy curvature, 16

B

Blasius Eq. for a straight tube, 40
Bouyancy effect, 16
Boundary layer Eqs., 49-53

C

Channel geometric characteristic, 31
Concave, convex walls, 96, 97, 107
Coriolis forces, 5
Curvature diameter of channel, 8
Curved channel, 93
Curvilinear channel, 8, 9

D

Density stratification, 15,70
Determining skin friction, 40

E

Effect wall curvature, 16
Enhancing heat transfer, 106
Experimental investigation, 17-34
Experimental section, 22-29

F

Finite-difference form, 59
Flow mode, 101
Fluctuating temperature, 46, 47

Friction

factor in coils, 111
stress, 40

G

Generalization heat transfer in coils,
138
Gravitational forces, 5

H

Heat load, 88
Heat transfer
along tube length, 66
annular channel, 109
coils, 36, 133
concave and convex walls, 99
development, 76
enhancement, 125
experimental data in tube,
(see Appendix, 160-168)
forced and mixed, 66
helical channels, 36,
(see Appendix, 169-173)
straight tube, 129
transition region convex wall, 100,
106
variations characteristics, 72, 73,
127
Heating
bilateral, 109
unilateral, 109
Helical channel, 107, 108
Hot-wire anemometer, film, 26-28,
40-43

- I
- Initial hydrodynamic section, 99
Iteration methods, 59
- K
- Kolmogorov - Prandtl, 5
- L
- Laminarization, 10
Laminar flow in curved channel, 9
Laminar vortex flow, 100-104, 122
Local heat transfer, 35
 concave, convex wall, 107
 generalization, 87
 helical channel, 35, 107
 in coils, 125,
 (see Appendix, 184-190)
 short curved channel, 108
Local shear stress, 112
 fluctuation, 115
 initial hydrodynamic section, 119
 perimeter of tubes, 114
- M
- Mass forces, 5, 9
Measurement turbulent characteristics, 42
Methods processings data, 34-40
Mixed convection, 36, 48, 53, 56
Mixing length, 16
Monin - Obukhov Eq., 16
- N
- Numerical methods
 calculations, 48
 comparison with experimental, 81
- P
- Physical properties
 variable, 51, 79
Pitot - Prandtl tube, 46
Plane curved channel, 144
- R
- Relative drag coefficient, 123
Reynolds stresses, 17, 54, 98
Richardson number, 16
- S
- Stefan - Boltzmann law, 37
Shear stress
 fluctuation in straight tube, 41
 in coils,
 (see Appendix 174-183)
 turbulent, 71, 75
- T
- Tangential stress, 124
Taylor - Görtler vortex, 16, 96, 99
Thermogravitational action
 forces, 61, 70
 various effects, 64, 76
Temperature
 distributions, 68, 69
 factor, 135-137
 longitudinal gradient, 8
 oscillations, 48
 profiles, 14
 pulsations, 56
Turbulence model, 56
Turbulent
 energy balance, 77, 78
 energy generation, 76

flow, 102
flow structure, 70
heat flux, 71
inlet flow, 87
kinetic energy, 69
pulsation, 14
transport development, 66, 76

V

Velocity
 evolution, 75, 77

oscillations, 47
profiles, 75, 96, 97
variation, 94, 96

W

Wall curvature, 16
Wall temperature dynamics, 79

Z

Zone
 laminarization, 81, 89
